User Manual – Analog Input Module

1. Important Notes

Solid state equipment has operational characteristics differing from those of electromechanical equipment.

Safety Guidelines for the Application, Installation and Maintenance of Solid State Controls describes some important differences between solid state equipment and hard-wired electromechanical devices.

Because of this difference, and also because of the wide variety of uses for solid state equipment, all persons responsible for applying this equipment must satisfy themselves that each intended application of this equipment is acceptable.

In no event will Hitachi be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this manual are included solely for illustrative purposes. Because of the many variables and requirements associated with any particular installation, Hitachi cannot assume responsibility or liability for actual use based on the examples and diagrams.

Warning!

- ✓ **If you don't follow the directions, it could cause a personal injury, damage to the equipment or explosion**
- Do not assemble the products and wire with power applied to the system. Else it may cause an electric arc, which can result into unexpected and potentially dangerous action by field devices. Arching is explosion risk in hazardous locations. Be sure that the area is non-hazardous or remove system power appropriately before assembling or wiring the modules.
- Do not touch any terminal blocks or IO modules when system is running. Else it may cause the unit to an electric shock or malfunction.
- Keep away from the strange metallic materials not related to the unit and wiring works should be controlled by the electric expert engineer. Else it may cause the unit to a fire, electric shock or malfunction.

Caution!

- ✓ **If you disobey the instructions, there may be possibility of personal injury, damage to equipment or explosion. Please follow below Instructions.**
- Check the rated voltage and terminal array before wiring. Avoid the circumstances over 55°C of temperature. Avoid placing it directly in the sunlight.
- Avoid the place under circumstances over 85% of humidity.
- Do not place Modules near by the inflammable material. Else it may cause a fire.
- Do not permit any vibration approaching it directly.
- Go through module specification carefully, ensure inputs, output connections are made with the specifications. Use standard cables for wiring.
- Use Product under pollution degree 2 environment.

1.1. Safety Instruction

1.1.1. Symbols

| | |
|---|--|
| <p>DANGER</p>  | <p>Identifies information about practices or circumstances that can cause an explosion in a hazardous environment, which may lead to personal injury or death property damage, or economic loss</p> |
| <p>IMPORTANT</p> | <p>Identifies information that is critical for successful application and understanding of the product</p> |
| <p>ATTENTION</p>  | <p>Identifies information about practices or circumstances that can lead to personal Injury, property damage, or economic loss. Attentions help you to identity a hazard, avoid a hazard, and recognize the consequences</p> |

1.1.2. Safety Notes

| | |
|--|--|
| <p>DANGER</p>  | <p>The modules are equipped with electronic components that may be destroyed by electrostatic discharge. When handling the modules, ensure that the environment (persons, workplace and packing) is well grounded. Avoid touching conductive components, e.g. FnBUS Pin.</p> |

| Items | Specification |
|------------------------------|--|
| Input Specification | |
| Number of Inputs | 4 Channels Single Ended, Non-isolated Between Channels |
| Indicators | 4 Green/Red States, 1 Green/Red FnBus State |
| Resolution in Ranges | 12Bits : 4.8mV/Bit |
| Input current Range | -10~10Vdc |
| Data Format | 16bits Integer (2's compliment) |
| Module Error | ±0.1% Full Scale @25°C ±0.3% Full Scale @0°C, 60°C |
| Input Impedance | 500KΩ |
| Conversion Time | 4msec / All channel |
| Calibration | Not Required |
| Diagnostic | No |
| Common Type | 4 Channels / 2COM (Single Common) |
| General Specification | |
| Power Supply | From System Power DC/DC |
| Power Dissipation | Max. 170mA @ 5.0Vdc |
| Isolation | I/O to Logic : Photocoupler isolation Field power : Not Connected |
| Wiring | I/O Cable Max. 2.0 mm ² |
| Weight | 70g |

- For more Accuracy, strongly recommend to use Extern PT100 Sensor for Cold Junction Compensation.
- If External PT100 Sensor is found, RIO2-TC4/3808 uses PT100 Temperature as Cold Junction Compensation.

ATTENTION

In this manual, it couldn't be described all variety case with Network Adapter of several protocols. So if you couldn't find any fault after investigating all below cases, refer to NA user manual.

6.1. Normal Module

| LED Status | Cause | Action |
|-----------------------------|-----------------------------|--|
| EXPANSION MODULE STATUS LED | | Device has no expansion Module or may not be powered |
| Off | Not Power No Initialized | The Parameter is not initialized yet. |
